CLAIMS

I/we claim:

1. A food mold, comprising:

a bottom portion comprising a peripheral edge and a bottom surface, the peripheral edge surrounding the bottom surface;

a sidewall comprising a lower edge and an upper edge opposite to the lower edge, wherein the sidewall surrounds the bottom portion, and the lower edge is connected to the peripheral edge; and

a protruding structure disposed on the bottom surface, and comprising a first post centrally disposed on the bottom surface, and a plurality of second posts disposed on the bottom surface and surrounding the first post, and a plurality of ribs disposed on the bottom surface, each of the plurality of ribs having an end connected to the first post and other end connected to a corresponding one of the second posts; and,

wherein the first post has a height relative to the bottom surface, each of the second posts has a second height relative to the bottom surface, and the first height is higher than the second height.

2. The food mold of claim 1, wherein the second posts are spaced apart equidistantly.

3. The food mold of claim 1, wherein the first post has a first diameter on the bottom surface, each of the second posts has a second diameter on the bottom surface, and the first diameter is larger than the second diameter.

4. The food mold of claim 1, further comprising a brim portion surrounding the sidewall and being connected to the upper edge.

5. The food mold of claim 4, wherein the brim portion extends from the upper edge in a direction away from the sidewall.

6. The food mold of claim 1, wherein the peripheral edge and the sidewall take on wavy outlines from a projective perspective.

7. The food mold of claim 1, wherein the bottom surface has a plurality of through holes.
