(54) Title: SECURE METHOD USING TOKEN AND IDENTITY DATA

FIG. 1

(57) Abstract: A method is disclosed. The method comprises receiving, by a token service computer from a token requestor, a request message comprising a first type of access data. The request message requests a second type of access data and a set of user attributes or assertions thereof for a user. The method further includes transmitting, to an identity hub, a request for the set of user attributes or assertions thereof of the user, the request including the first type of access data, and receiving, from the identity hub, a response message comprising the requested set of user attributes or assertions thereof of the user. The method further includes providing, to the token requestor, a modified response message including the requested set of user attributes or assertions thereof of the user and the second type of access data.
