CLAIMS

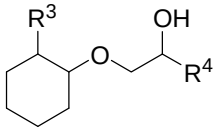

[Claim 1] A fragrance composition comprising a compound represented by a general formula (I) and a compound represented by a general formula (II),

wherein a mass ratio of the compound represented by the formula (I) to the compound represented by the formula (II) [compound represented by formula (I):compound represented by formula (II)] is 0.10:99.90 or more and 4.00:96.00 or less:

[Chemical Formula 19]

(I)

(II)

where

R^1 and R^3 are each independently an alkyl group having 1 or more and 5 or less carbon atoms, and

R^2 and R^4 are each independently a hydrogen atom or an alkyl group having 1 or more and 4 or less carbon atoms.

[Claim 2] The fragrance composition according to claim 1, wherein R^1 and R^3 are t-butyl groups.

[Claim 3] The fragrance composition according to claim 1 or 2, wherein R^2 and R^4 are independently a methyl group or an ethyl group.

[Claim 4] The fragrance composition according to any one of claims 1 to 3, wherein R^1 and R^3 are t-butyl groups, and R^2 and R^4 are ethyl groups.

[Claim 5] The fragrance composition according to any one of claims 1 to 4, wherein the mass ratio of the compound represented by the formula (I) to the compound represented by the formula (II) [compound represented by formula (I):compound represented by formula (II)] is 0.25:99.75 or more and 2.00:98.00 or less.

[Claim 6] The fragrance composition according to any one of claims 1 to 5, further comprising at least one component that is other than the compounds represented by the formulae (I) and (II) and is selected from alcohols, phenols, esters, carbonates, aldehydes, ketones, acetals, ethers, lactones, and nitriles.

[Claim 7] A cosmetic comprising the fragrance composition according to any one of claims 1 to 6.

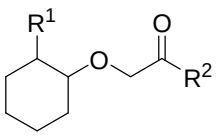

[Claim 8] A cleaning composition comprising the fragrance composition according to any one of claims 1 to 6.

[Claim 9] A fiber treating agent composition comprising the fragrance composition according to any one of claims 1 to 6.

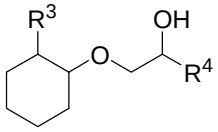

[Claim 10] A method of using a composition as a fragrance-imparting component, the composition consisting of a compound represented by a general formula (I) and a compound represented by a general formula (II),

wherein a mass ratio of the compound represented by the formula (I) to the compound represented by the formula (II) [compound represented by formula (I):compound represented by formula (II)] is 0.10:99.90 or more and 4.00:96.00 or less:

[Chemical Formula 20]

(I)

(II)

where

R^1 and R^3 are each independently an alkyl group having 1 or more and 5 or less carbon atoms, and

R^2 and R^4 are each independently a hydrogen atom or an alkyl group having 1 or more and 4 or less carbon atoms.
