(54) Title: LAG-3 SPLICE VARIANTS

(57) Abstract

This invention concerns an isolated nucleotidic sequence selected from the group consisting of: a) the nucleotidic sequences SEQ ID NO 1, SEQ ID NO 3 or SEQ ID NO 5; b) the nucleotidic sequences which hybridize under stringent conditions to any of the sequences defined in a) and which code for a polypeptide which is a variant of the LAG-3 molecule; c) the nucleotidic sequences which are degenerated as results of the genetic code to the nucleotidic sequences defined in a) and b), and which code for a polypeptide which is a genetic variant of the LAG-3 molecule.
