

[図1]

[図2]

[illegible]

Figure 1 is a schematic cross-sectional view of a laminated body 1. The body consists of a central white layer 12 and two outer layers 11 with diagonal hatching. The total thickness is R1, and the central layer 12 has thickness R2. The outer layers 11 are divided into regions 11a and 11b. The width is divided into L2 and L3. A dashed vertical line indicates a center of symmetry. Arrows at the bottom indicate the front (前方) and back (後方) directions.
