(54) **Title**: METHOD AND SYSTEM FOR IDENTIFICATION OF CREDENTIALS STORED IN A COMPUTING DEVICE

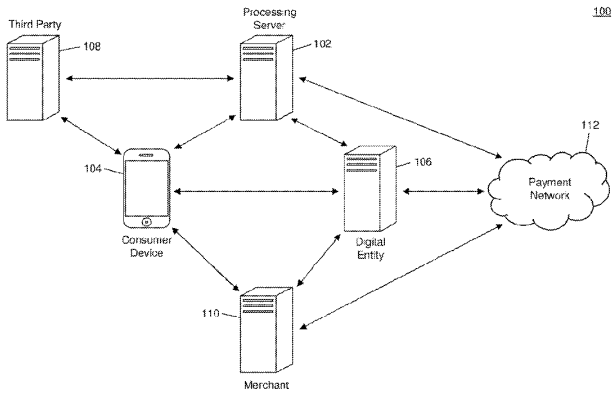

FIG. 1

(57) **Abstract**: A method for identifying payment credentials using a proxy electronic wallet comprises storing an account profile for a proxy electronic wallet that includes payment credentials for one or more payment accounts and account and/or payment credentials payment accounts associated with one or more paired electronic wallets. An account request is received from a digital entity that indicates the account profile, payment account identifiers are transmitted to a user computing device, a selection of a payment account is received from the user computing device, and a corresponding set of credentials in the account profile are identified. The credentials are then transmitted, where payment credentials are transmitted for use in a transaction, and account credentials are transmitted to an entity associated with the paired electronic wallet for use in identifying and providing corresponding payment credentials.
