(54) Title: HANDLING A SECONDARY CELL GROUP CONFIGURATION

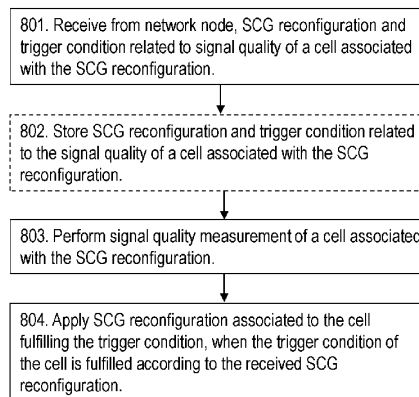

Fig. 8
Method in a UE

(57) Abstract: A method performed by a User Equipment, UE, for handling a Secondary Cell Group, SCG, configuration in a wireless communications network is provided. The UE receives (801) from a network node, an SCG configuration and a trigger condition related to the signal quality of a cell associated with the SCG configuration. The UE then performs (803) signal quality measurements of a cell associated with the SCG configuration. When the trigger condition of the cell is fulfilled according to the received SCG configuration, the UE applies (804) the SCG configuration associated to the cell fulfilling the trigger condition.
