

ABSTRACT

The present disclosure provides a document access method and apparatus, a device, a storage medium, and a program product. The method comprises: in response to a user having a first access permission of a first document, displaying document content of the first document; in response to receiving an access request for target information displayed in the document content of the first document, determining whether the user has a second access permission; and if the user does not have the second access permission, refusing to display associated content of the target information, the target information comprising at least one of the following: a link of a second document, a collaborator of the first document, and a user identifier displayed in the first document.
