## TEXT OF THE ABSTRACT

ROBOT SYSTEM

A robot system (81) comprising:  
an arm (92) equipped with a retainer (94) section for retaining a workpiece (8); and  
arm drive means for moving said arm in such a manner that the workpiece is transferred to a processing position,  
wherein a first nozzle (95) incorporating a blowoff port having a longer diameter than the long side of the workpiece is provided for blowing off a clean gas from the blowoff port in such a manner as to envelop and separate the workpiece from the external atmosphere.
