

METHOD AND COMPUTING DEVICE FOR INFORMING ABOUT MALICIOUS WEB RESOURCES

ABSTRACT

5

A computing device and a method for informing about malicious web resources. The method comprises: obtaining references to a variety of web resources; identifying malicious web resources in a specified set; establishing web resources associated with each of the identified resources; detecting malicious web resources in the identified related web resources;
10 identifying at least one authorized entity associated with each of the identified malicious web resources; generating at least one report; sending each generated report to the appropriate authorized entity.
