

Method And System For Shipment Support Management

Abstract

5 This invention is related to a system and a method for supporting the
shipment of goods without a buyer. In particular, the location of the goods are
tracked and updated in the register. Further, the timeliness of the movement of the
goods are also tracked and updated in the register. Based on the information in the
register, certain reports such as carrier performance report and inventory
10 management report can be generated.
