

INFORMATION PROCESSING DEVICE, INFORMATION PROCESSING
METHOD, AND PROGRAM

5

ABSTRACT

There is provided an information processing device including a storage unit configured to store applications, application information corresponding to each of the applications, and state management information in which the application information is stored in association with a priority level, and a control unit configured to control a
10 valid state and an invalid state of the application by managing the application information stored in the state management information based on a process command.
