# COMPOSITIONS AND METHODS FOR INTRAVENOUS ADMINISTRATION OF 2-BROMO-1-(3,3-DINITROAZETIDIN-1-YL)ETHANONE

## ABSTRACT

The invention provides compositions and methods for intravenous administration of 2-bromo-1-(3,3-dinitroazetidin-1-yl)ethanone (ABDNAZ), including formulations containing autologous whole blood and ABDNAZ that can be rapidly administered to a patient by intravenous infusion without any significant pain at the site of infusion.
