- (54) **Title:** PORTABLE LIGHT STAND

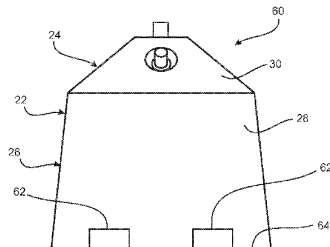

Fig. 8

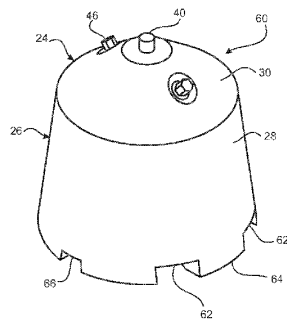

Fig. 9

(57) **Abstract:** A fillable base (60) for a portable light stand, the base comprising: a hollow structure (22) made from moulded plastics material, the hollow structure having an upper portion (24) and a lower portion (26) with a generally circular footprint. The lower portion (26) of the hollow structure (22) has a substantially vertical cylindrical outer side wall (28), and the upper portion (24) of the hollow structure has a conical outer side wall (30). The conical outer side wall (30) has an outer edge extending from a top edge of the cylindrical side wall (28) to an apex of the upper portion (24) of the structure. The structure (22) also has a recess (38) that opens at the apex and within which one end of an elongate pole can be received.
