(54) Title: CONDUCTIVE ADHESIVE TAPE HAVING DIFFERENT ADHESION ON BOTH SURFACES AND METHOD FOR MANUFACTURING THE SAME

(57) Abstract: Disclosed is an electro-conductive adhesive tape having different adhesion values on both surfaces thereof. A method for producing the same is also disclosed. The adhesive tape has different adhesion values on both surfaces thereof, elasticity, and electroconductivity along the longitudinal direction as well as the transverse direction. Thus, the adhesive tape can be used in electronic components, as an electromagnetic wave-shielding tape that permits easy attachment/detachment.
