(54) Title: METHOD AND SYSTEM FOR PREVENTING TRANSMISSION OF MALICIOUS CONTENTS

(57) Abstract: A method and a system for preventing transmission of malicious contents are provided. The method includes intercepting at a network gateway device of a server network a digital communication being sent from the server network to an external network; searching the digital communication for a malicious transmission schema that can be used to cause a malicious transmission on a recipient of the digital communication; and taking an action to hinder the transmission of malicious contents if a malicious transmission schema is found.
