(54) Title: SYSTEM AND METHOD FOR ESTABLISHING COMMON REQUEST PROCESSING

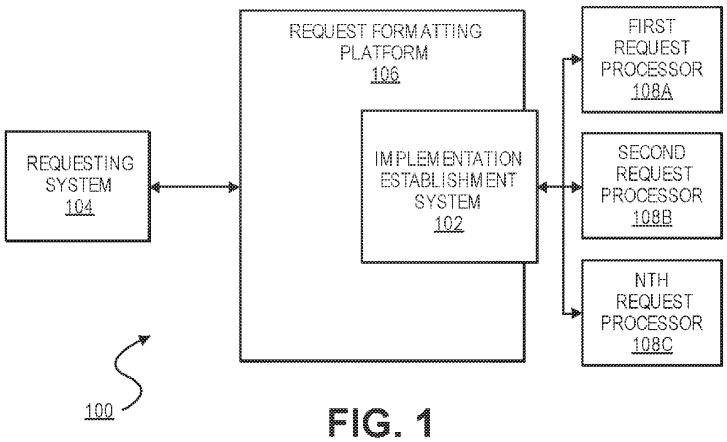

FIG. 1

(57) Abstract: A method is disclosed. An implementation establishment system may receive a first message including a request method model and a template from a request processor. The implementation establishment system may generate at least one test API call based on the request method model and the template. The implementation establishment system may then transmit the at least one test API call to the request processor. The implementation establishment system may receive at least one response based on the at least one test API call from the request processor. The implementation establishment system may evaluate the at least one response. The implementation establishment system may generate a response notification based on the at least one response. The implementation establishment system may transmit the response notification to the request processor.
