(54) Title: HIGH-POTENCY VITAMIN C AND SUGAR ALCOHOL TOPICAL FORMULATIONS

(57) Abstract: Topical formulations of L-ascorbic acid dissolved in a combination of a sugar alcohol agent, and a non-aqueous skin-compatible solvent are provided. The formulations are storage stable for an extended period of time without significant degradation of the L-ascorbic acid in the composition, and have desirable physical properties. The topical formulations can include high concentrations of the L-ascorbic acid. Topical compositions of this disclosure find use in treating or preventing a variety of cosmetic and/or dermatological conditions as well as to reduce the appearance of chronological and/or environmentally-caused skin aging.
