(54) Title: SYSTEM AND METHOD FOR IDENTIFYING AND GENERATING BUSINESS EVENTS

(57) Abstract: A system for identifying business events is provided. The system includes a store of business process policies, and a business process manager operative to define and process the business process policies. The system further includes an event manager. The event manager includes at least one rule-based application, at least one predictive application and a store of business events. The event manager is operative to employ the rule-based application and predictive application to identify business events according to the stored business process policies.
