(54) Title: COMPRESSED DRY-GRANULATION DESOGESTREL TABLETS

(57) Abstract

The invention concerns compressed dry-granulation tablets or granules comprising desogestrel obtainable by roller compaction or by slugging, which can be prepared by a method of production, whereby desogestrel, optionally together with other active compounds and/or excipients, in a first step of the process is compressed by applying elevated pressure, and thereafter in a second step is crushed into particles, after which in a third step the particles may be processed into tablets or filled into capsules, using methods known in the art.
