(54) Title: METHOD OF TERMINATING A STRANDED SYNTHETIC FILAMENT CABLE

(57) Abstract: A method for straightening, constraining, cutting and terminating a multi-stranded, non-parallel cable. The cable filaments are aligned. A binder is then applied to the cable to maintain the alignment. The cable is then cut to a desired length. Each strand or group of strands is then placed in an individual termination. Each individual termination is then attached - either directly or through intermediate devices - to a collector.
