

ABSTRACT

5 Provided herein is an automatic cell culture device including an incubator
configured to contain at least one container for culturing cells, a microscope configured
to observe a state of the cell in the container, a robot arm configured to move the
container, a liquid handler configured to introduce liquid into or discharge liquid from the
container, and a control device configured to control an operation of at least one of the
10 incubator, the microscope, the robot arm, and the liquid handler.
