

ABSTRACT

5 The present disclosure provides a virtual avatar generation method and
apparatus, and a storage medium. One of embodiments of the method includes:
determining a target task associated with at least one target face property, where the
at least one target face property is one of a plurality of predefined face properties
respectively; performing, according to the target task, target face property analysis
10 on a target image including at least a face to obtain a target face property feature
associated with the target face property of the target image; determining a target
virtual avatar template corresponding to the target face property feature according to
predefined correspondence between face property features and virtual avatar
templates; and generating a virtual avatar of the target image based on the target
15 virtual avatar template.
