(54) Title: PERSONALIZED TOY FIGURE AND METHOD FOR CREATING THE TOY FIGURE FROM A DIGITAL IMAGE

FIG. 1A

FIG. 1B

FIG. 1C

FIG. 1D

(57) Abstract: A method of producing a toy figure comprising imprinting a digital image on a top surface of the image receptive material, the image receptive material having adhesive covered by a peelable paper back on a bottom surface removing the peelable paper back from the bottom surface to expose the adhesive. Manually folding the image receptive material containing the digital image along a fold line that divides the image receptive material into two sections, a first layer and a second layer. Mutually engaging the exposed adhesive on the bottom surface of the first layer and the second layer to form a two-sided first portion and pairing the first portion with a second portion comprising at least one connecting groove configured to engage with the first portion to hold the first portion in a desired position in three-dimensional space relative to the second portion. And, a three-dimensional base part, wherein the three-dimensional base part comprises at least one of: shoes, feet, an animal, an animal part, a vehicle, or a plant base that is configured
