

A B S T R A C T

A RELAXATION SOLE AND A SHOE FITTED WITH SUCH A SOLE

The invention relates to a relaxation sole (1)
comprising a sole body having a top face and a bottom
5 face, a housing in the sub-calcaneum support region (2),
said housing opening out at least into the bottom face,
an elastically deformable structure disposed in the
housing of the sole body, and a skin covering the top
face of the sole body and the elastic structure.
