ABSTRACT

An insulation film, a pin structure and a battery are provided. The insulation film includes an insulation film body and a colloid. The insulation film body includes a first insulation portion and a second insulation portion. The first insulation portion extends along a first direction, and the second insulation portion extends along a second direction and is connected to the first insulation portion; the colloid is disposed on the first insulation portion; the projection of the colloid on the insulation film body falls on the first insulation portion and falls outside the second insulation portion; the colloid is configured to connect the first insulation portion with the pin.
