(54) Title: INNOVATIVE INTELLIGENT HEAT EXHAUST AND AIR-CON SYSTEMS FOR DATA CENTRES OR SIMI-
LAR FACILITIES

(57) Abstract: The application provides a room. The room comprises a room wall, a room air outlet, a cabinet with an enclosure, and one or more fans. The room wall separates air inside the room from air outside the room. The room air outlet connects an inside of the room with an outside of the room. The enclosure receives one or more electrical equipments. The enclosure comprises a first zone and a second zone. The first zone provides an equipment space for taking up the one or more electrical equipments and the second zone is provided with a cabinet air outlet. The cabinet air outlet is connected with the room air outlet. The fans are used for generating an air stream from the equipment space to the second zone, from the second zone to the cabinet air outlet and from the cabinet air outlet to the room air outlet.
