(54) Title: NON-INVERTING TRANSFLECTIVE ASSEMBLY FOR DISPLAY PANELS

(57) Abstract: A film that includes a first reflective polarizer (104) substantially reflecting light having a first polarization state and substantially transmitting light having a second polarization state, a polarization rotating layer (106) or depolarizing layer (112) or both positioned to receive light passing through the first reflective polarizer (104), and a second reflective polarizer (108) positioned to receive light passing through the polarization rotating layer (106) or depolarizing layer (112), the second reflective polarizer (108) substantially reflecting light having a third polarization state back through the polarization rotating layer (106) or depolarizing layer (112) and substantially transmitting light having a fourth polarization state. Articles containing the film can be formed.
