ABSTRACT

METHOD AND INSTALLATION FOR FIGHTING FIRE

The object of the invention is to provide a new method and a new installation for fighting fire, in particular for spaces involving fire risk under a floor structure or in cabinets for electrical apparatuses. According to the invention, a liquid fog is sprayed in the major part of the space, which major part can be considered as a normal room, while a non-combustible gas, preferably heavier than air, is sprayed into narrow partial spaces for cables etc.
