

ABSTRACT**EYE SOCKETS MASSAGER**

An eye sockets massager includes an eyeshade (1), air bladder assembly (2), an air pump (6) and at least one exhaust valve, wherein the air bladder assembly (2) includes a central bladder (21), a left bladder (22) and a right bladder (23) separately disposed from one another and respectively connected to the at least one exhaust valve. The air pump (6) is provided to respectively pump air into the central bladder (21), the left bladder (22) and the right bladder (23). The eye sockets massager includes a first exhaust valve (4) and a second exhaust valve (5), wherein the central bladder (21) is connected to the first exhaust valve (4), and the left bladder (22) and the right bladder (23) are respectively connected to the second exhaust valve (5).
