

ABSTRACT**APPARATUS FOR CUTTING AND EJECTING NOODLES, AND NOODLE
SCRAPER**

A noodle scraper includes: a plate body having a bent section extending along a longitudinal direction; a plurality of first scraping tines having a longest tine-length; and a plurality of second scraping tines having a tine-length which is shorter than that of the first scraping tine, wherein the plurality of first scraping tines and the plurality of second scraping tines are alternately provided at one of long sides of the plate body in a comb form; the second scraping tine includes a tine-base section or a tine-middle section; and the tine-base section or the tine-middle section is formed in a folded shape or a curved shape, wherein a tine-edge section of the first scraping tine or a tine-edge section of the second scraping tine includes a sloped face that is sloped in a vertical cross-section orthogonal to a direction in which the tine-edge section extends.
