[CLAIMS]

What is claimed is:

[Claim 1]

A polyethylene-based-resin composition comprising:

an inorganic compound; and

an ethylene-α-olefin copolymer,

wherein the inorganic compound is calcium carbonate,

at least a part of the ethylene-α-olefin copolymer is an ethylene-α-olefin copolymer A in which α-olefin has 6 to 8 carbon atoms and a melt flow rate is 0.8 g/10 min or more and 4.0 g/10 min or less,

an amount of the inorganic compound is 50% by mass or more and 80% by mass or less with respect to a total mass of the resin composition, and

an amount of the ethylene-α-olefin copolymer A is 10% by mass or more and 50% by mass or less with respect to the total mass of the resin composition.

[Claim 2]

The polyethylene-based-resin composition according to Claim 1,

wherein the ethylene-α-olefin copolymer A has a melting point of 90°C or higher and 130°C or lower.

[Claim 3]

A polyethylene-based-resin packaging material formed from the polyethylene-based-resin composition according to Claim 1 or 2.

[Claim 4]

The polyethylene-based-resin packaging material according to Claim 3,

wherein the polyethylene-based-resin packaging material is for a garbage bag, a

shopping bag, a fashion bag, a storage bag, or a packing bag.
