(54) Title: BUILDING APPLICATIONS FOR CONFIGURING PROCESSES

FIG. 3

(57) Abstract: Methods, systems, and apparatus, including
computer programs encoded on computer storage media, for
specifying a user interface. One of the methods includes re-
ceiving an identification of at least one configurable applica-
tion, each configurable application being configurable by
one or more parameters. The method includes identifying a
set of parameters associated with the at least one configu-
rable application. The method includes displaying, in a
second user interface, a graphical display element, the
graphical display element having properties and associated
with a location relative to the first user interface. The meth-
od includes displaying, in the second user interface, one or
more graphical representations of the set of parameters. The
method includes receiving a mapping between a property of
the graphical display element and a parameter of the set of
parameters. The method also includes storing a representa-
tion of the mapping and the location.
