Abstract

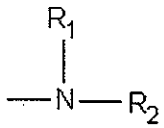

A stabiliser composition for chlorine-containing polymers comprising compounds represented by the general formula (1):

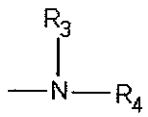

wherein X, Y, and Z are each selected independently of the other,

wherein

X is hydrogen or

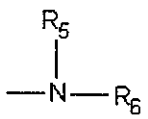

Y is hydrogen or

and

Z is hydrogen or

wherein

R1, R2, R3, R4, R5, and R6 are each independently a hydrogen, alkyl, alkenyl, cycloalkyl, cycloalkenyl, phenylalkyl and aryl group, and

wherein

A is oxygen (O) or sulfur (S).
