(54) Title: VIRTUAL SALESMAN

(57) Abstract: The Virtual Salesman is the combination of avirtual mannequin, which is a Plexiglass or any transparent material cut-out, that has a special projection foil stuck on the back which turns it into hi-resolution projection screen.A pre-recorded video of an actor/actress or animated character is then projected onto the cut-out, this creates a lifelike video image. There are speakers for sound, either built into the kiosk or in the booth construction.The Virtual Salesman combines this to a touch screen kiosk or touchscreen with an interface having user selectable options, each option having a moving image and or verbal command associated with the option selected on the touchscreen or touchscreen kiosk. The Virtual Salesman reacts to the option selected on the touchscreen or touchscreen kiosk through visual and verbal recordings on the cut-out virtual mannequin.
