

**DISPLAY APPARATUS, DRIVING METHOD FOR DISPLAY APPARATUS
AND ELECTRONIC APPARATUS**

ABSTRACT OF THE DISCLOSURE

Disclosed herein is a display apparatus, including a pixel array section; and a driving section; the pixel array section including a plurality of scanning lines extending along the direction of a row, a plurality of signal lines extending along the direction of a column, a plurality of pixels disposed in rows and columns at places at which the scanning lines and the signal lines intersect with each other, and a plurality of feed lines disposed in parallel to the scanning lines, the driving section including a signal selector for supplying a driving signal having a signal potential to the signal lines, a write scanner for successively supplying a control signal to the scanning lines, and a drive scanner for supplying a power supply, which changes over between a high potential and a low potential, to the feed lines.
