

Abstract

The present disclosure relates to a battery box, including: a case, where a top portion of the case is provided with an opening; and a top cover including a cover body; where the top cover further includes a boss connected to an edge of the cover body, and the boss is welded to the case to co-seal the opening with the cover body; the boss has a first top portion and an opposite first bottom portion, the cover body has a second top portion and an opposite second bottom portion, a distance between the first top portion and the first bottom portion is greater than a distance between the second top portion and the second bottom portion, and the first bottom portion is provided with a guide portion.
