

Abstract

The present invention discloses a kind of Shinyleaf yellowhorn extract mainly consisting of Shinyleaf yellowhorn total saponins, which accounts for more than 50% of the total weight of the dried Shinyleaf yellowhorn extract. The present invention also provides a method for preparing the above extract, as well as its use in the treatment of the urinary incontinence and frequent micturition due to senile dementia or urinary bladder degradation, children enuresis, pediatric mental retardation, brain aging, middle-aged and senile dementia and Parkinson's syndrome. The pharmaceutical preparations of the present invention include injections, tablets, capsules, soft capsules, oral liquid, drop pills, etc.
