(54) Title: DATA MANAGER FOR WIRELESS COMMUNICATION DEVICES AND METHOD OF MANAGING DATA IN A WIRELESS DEVICE

(57) Abstract: A data manager, and a method of managing data, for a wireless device. The data manager includes a data receiver that receives voice data over the internet protocol connection, a data sender that sends other voice data over the internet protocol connection, a data recognizer that differentiates the voice data and the other voice data from non-voice data and non-data, and a controller that broadcasts the voice data and the other voice data in an internet voice protocol format. The method includes the steps of receiving voice data over the internet protocol connection at the wireless device, sending other voice data over the internet protocol connection from the wireless device, differentiating the voice data from non-voice data and non-data, differentiating the other voice data from other non-voice data and non-data, and controlling the broadcast of the voice data, and the other voice data.
