- with international search report (Art. 21(3))
- with sequence listing part of description (Rule 5.2(a))

(54) **Title:** TARGETED INTEGRATION OF NUCLEIC ACIDS

Figure 1. An overview of the supertransfection expression constructs and the three different supertransfection approaches.

(57) **Abstract:** The presently disclosed subject matter relates to targeted integration (TI) host cells suitable for the expression of recombinant proteins wherein those TI host cells have been subjected to supertransfection resulting in the random integration (RI) of exogenous nucleic acids encodes into their genome, as well as methods of producing and using said supertransfected TI host cells.
