(54) Title: SYSTEM AND METHOD FOR OBTAINING AND STORING INFORMATION FOR DEFERRED BROWSING

(57) Abstract: A system and method are disclosed which allow a user to capture and manage information for later review without interrupting the user's current activity, such as browsing the web, viewing streaming media, or operating a mobile computing device while traveling. The system includes a user interface, a local database application, and: a web browser and web browser plug-in, a streaming media server and streaming media player application, or a GPS unit. The method for capturing information while using a web browser or a streaming media player application includes the steps of selecting an object, obtaining local origination data, and storing the object and local origination data. The method for capturing information while using a mobile computing device having GPS capability includes activating a GPS capture function, obtaining local origination data storing GPS objects and local origination data, and generating an index to geographically relevant objects.
