

ABSTRACT

Assembly for roadway manhole comprising a frame, a cover and a kit allowing the hinged mounting of the cover on the frame.

The present invention relates to an assembly for a roadway manhole comprising a frame, a cover and a kit allowing the cover to be hingedly mounted on the frame. According to the invention, the assembly is characterised in that the frame (3) comprises a part (30) added to a seating surface and which is provided with at least one hinging element (33) which can be coupled with a corresponding hinging element (44) of the cover (4) so such as to allow the latter to be hinged to the added part (30). The invention is applicable in the field of road equipment.
