CLAIMS

[Claim 1]

An ankle joint bandage comprising:

a band-shaped main body part which is woven in a fabric and composed of a winding part which is wound around an ankle of a wearer, a first supporting part which is disposed from an instep to the ankle of the wearer, and a second supporting part which is disposed from the ankle to the instep of the wearer to cross the first supporting part at an upper portion of the instep of the wearer;

an anchor part which is joined to one end of the main body part, is woven in a fabric having a loop face of a touch fastener, and is fastened around a part corresponding to a metatarsal bone of the wearer; and

an engaging part which is joined to the other end of the main body part and has a hook face of a touch fastener, which is detachably stuck to the loop face of the anchor part, wherein the anchor part and the main body part are joined to each other with an angle between a circumferential direction of the anchor part and a longitudinal direction of the main body part being in a range of 145° to 165°.

[Claim 2]

The ankle joint bandage according to Claim 1, wherein

the first supporting part is provided on the one end side of the main body part, the second supporting part is provided on the other end side of the main body part, the winding part is provided between the first supporting part and the second supporting part, and the first supporting part, the winding part, and the second supporting part have straight line shapes having the same width.

[Claim 3]

The ankle joint bandage according to Claim 1 or 2, wherein a maximum elongation in a longitudinal direction of the main body part is in a range of 40% to 80%.

[Claim 4]

The ankle joint bandage according to any one of Claims 1 to 3, wherein a joining portion between the anchor part and one end of the main body part is sewn convexly to the other end side of the main body part so as to become longer than a length in a width direction of the main body part.

[Claim 5]

The ankle joint bandage according to any one of Claims 1 to 4, wherein the anchor part has the form of a substantially conical tube.

[Claim 6]

The ankle joint bandage according to any one of Claims 1 to 5, wherein a pattern composed of characters, figures, symbols, or a combination thereof is formed in a front ground face of the main body part.
