(54) Title: METHOD AND APPARATUS FOR TRANSMITTING AND RECEIVING WIRELESS PACKET

(57) Abstract: A wireless packetization apparatus for transmitting/receiving multimedia data including video data in a radio trans-
mitting/receiving system, and a method thereof are provided. According to the present invention, error resilience can be increased
by adding an error protection code and a corruption indication flag to header information on a radio link protocol (RLP) layer when
multimedia data such as video data requiring real time or low delay is transmitted and received in a wireless environment, and a
packet drop rate can be thereby reduced.
