HANDRAIL BELT DISINFECTION APPARATUS AND HANDRAIL BELT DISINFECTION METHOD OF PASSENGER CONVEYOR

ABSTRACT

An object is to provide a handrail belt disinfection apparatus and a handrail belt disinfection method of a passenger conveyor which efficiently disinfect a handrail belt (5) while suppressing deterioration of the handrail belt (5). Provided is a handrail belt disinfection apparatus that includes a first light source (10) that is provided in a landing platform plate (F) which is positioned near an inlet portion (8) serving as an entry or exit point of a handrail belt (5) which circulates and moves in conjunction with the running of a passenger conveyor, the first light source (10) emitting ultraviolet light toward the handrail belt (5).
