(54) Title: SYSTEM FOR CREATING A VISUAL ANIMATION OF OBJECTS

**Fig. 1**

(57) **Abstract:** A system (100) for creating visual animation of objects (102) which can be experienced by a passenger (114) located within a moving vehicle (106) is provided. The system includes: a plurality of objects (102) being placed along a movement path (104) of the vehicle (106); a plurality of sensors (108) being assigned to the plurality of objects (102) and being arranged such along the movement path (104) that the vehicle (106) actuates the sensors (108) when moving along the movement path (104); and a plurality of highlighting devices (112) being coupled to the plurality of sensors (108) and being controlled by the sensors such that, in accordance with sensor actuations triggered by the movement of the vehicle (106), a) only one of the plurality of objects (102) is highlighted by the highlighting devices (112) to the passenger (114) at one time, and b) the objects (102) are highlighted to the passenger (114) in such a sequence that the passenger (114) visually experiences an animation of the objects (102).
