(54) Title: PRESBYOPIA TREATMENT BY LENS ALTERATION

(57) Abstract: Embodiments of the present invention relate to methods and pharmacological compositions to treat presbyopia in the human eye. According to the embodiments, pharmacological compositions may be applied to an eye to effect a change in the accommodative ability of the eye by the breaking and reduction of lenticular bonds in the eye that may be responsible for presbyopia. The compositions may be applied in an inactive state and subsequently be activated to achieve a therapeutic effect.
