(54) **Title:** SYSTEM FOR PARKING MANAGEMENT

(57) **Abstract:** The present invention relates to a parking management system. The parking management system includes an entrance camera (100) installed at an entrance of a parking lot to photograph a vehicle that enters the parking lot. An exit camera (200) photographs a vehicle that departs from the parking lot. A plurality of region cameras (300) is installed in respective parking regions to photograph a vehicle. A management server (400) includes a vehicle license number recognition unit (450) for recognizing a vehicle license number, a registration unit (460) for registering a last photographed parking region on a parking ticket, a control unit (440) for calculating a number of available parking spaces for each parking region, and determining a total number of available parking spaces, and a guidance unit (470) for guiding an entering vehicle to an available parking region. A display unit (350) displays the number of available parking spaces.
