

ABSTRACT

The invention relates to an interaction method and a device in a touch terminal, and an interaction method, a server and a computer storage medium in network application. The Interaction method in the touch terminal comprises steps of: acquiring touch event from a user; acquiring a slide track based on the continuous slide occurred by the touch event, and obtaining a selected interaction object based on the slide track; triggering the selected interaction object to response the touch event based on the slide track. By means of obtaining selected interaction object and slide track based on touch event inputted by user, and then realizing response of touch event by the slide track, the interaction method and the device in the touch terminal, and the interaction method, the server and the storage medium can achieve interaction operations without operations like click selection, twice confirmation, etc., the complexity of operation is reduced effectively and the convenience of operation is improved.
