

## ABSTRACT

A radiation-sensitive resin composition including an acid generator represented by General Formula (AG1). In General

5 Formula (AG1),  $R^1$  and  $R^2$  each independently represent a fluorine atom or  $-OR$ , where  $R$  is a monovalent organic group, and  $A^+$  is a counter cation. In addition, an acid generator represented by General Formula (AG1). In addition, a compound represented by General Formula (AG1).
